

PRINCE2 Foundation for Project Management

Quint Wellington Redwood Factsheet

Quint Wellington Redwood is a leading global independent consulting firm dedicated to resolving IT-related organizational challenges. Operating in more than 49 countries and across four continents, Quint provides strategy, sourcing and service management to leading organizations from all industries, creating and implementing best practices worldwide.

Quint was founded to help organizations get more from IT, not by adding more or new technology, but by simply managing IT better. The firm's portfolio of services includes education, consulting and measurement, integrated across the domains of business and IT. Quint's "Dare to Challenge" mission challenges itself and its clients to implement changes that deliver true results, outperform the competition and create a measurable return on investment. Quint's vision is to reinvent not only its clients' organizations, but also the consulting industry itself.

Introduction

PRINCE, whose initials correspond to PProjects IN Controlled Environments is a methodology that covers the organization, management, planning, monitoring and control of projects.

Although PRINCE was originally designed for IT projects, the latest version of this methodology, PRINCE2, is designed to meet the needs of current users and expand as a best practice approach in the management of all types of projects.

PRINCE2 is recognized as the standard of the British government for project management, and is used extensively worldwide in both public and private sectors.

This methodology applies a project management approach based on "processes" and provides an easily adaptable and scalable method. Each process is defined with specific objectives to be achieved, along with the key "inputs" and "outputs", the activities to develop and the roles and responsibilities.

Course Approach

Participants will learn the principles and key elements of the discipline of project management according to PRINCE2 approaches. It is an interactive method that includes lectures, activities/discussions and a case study.

Main Objectives

Participants will:

- Understand the benefits of a structured approach to project management.
- Learn the vocabulary and definitions for project management.
- Understand the processes, components and techniques of PRINCE2 methodology.
- Identify the main roles and responsibilities in the organization of a project.
- Recognize the PRINCE2 control points along the lifecycle of a project.
- Prepare, if necessary, for formal consideration of PRINCE2 fundamentals.

Target Audience

This course is suitable for professionals that are involved, at any level, in the direction, planning, coordination, implementation or supervision of any project.

Training can serve those who use PRINCE2 or other project management methodology and want to expand their knowledge and enhance their career in the leadership of projects.

Duration

Three-day course, including theory and case study.

Additionally, if required, a meeting that includes the preparation and completion of the certification exam.

Prerequisites

There are no specific prerequisites except an interest in the discipline of project management.

Number of Participants

A maximum of 16 persons per course.

Course Outline

Day 1:

Controlled Start

Day 2:

Controlled Progress

Day 3:

Controlled Close

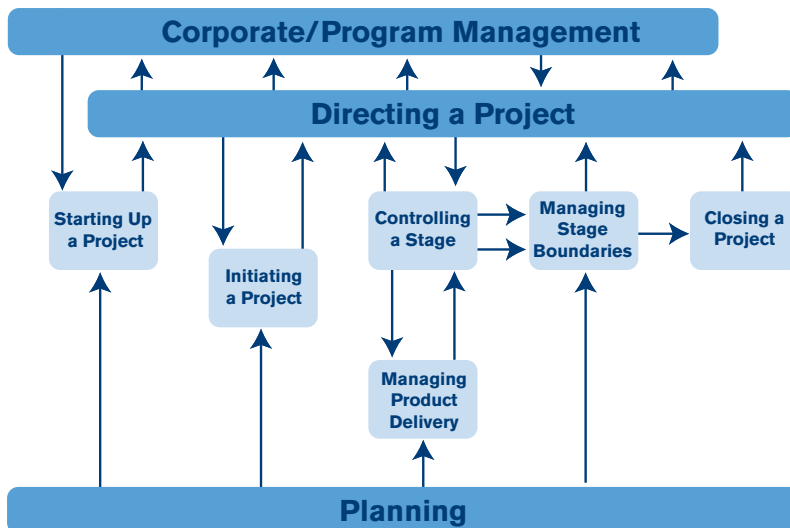

Certification

This course prepares the candidate for the "PRINCE2 Foundation Official Exam" (optional). Participants who perform the examination shall be prepared using sample questions and explanations from the instructor.

Why Quint Wellington Redwood?

- Quint is a global organization that has specialized in ITIL education, consulting and measurement solutions for over 15 years.
- Quint teaches over 17,000 students per year.
- Quint trainers have proven to achieve the best exam pass rates, and Quint trainers have extensive practical experience on the topics they teach.
